2.0X ⁽¹⁾	2.95	1.48	0.74	0.41	0.21	0.19	0.08	0.04

Specifications based on 1024 x 1024 Array

Notes: Optical Resolution is based on Sparrow Criteria = $0.5\lambda/NA$, where $\lambda = 570$ nm.

Slope Limit in degrees based on 1X field zoom lens; note that slope values are listed for specular surfaces; rougher surfaces can be measured at much higher slope limits.

Parfocal Dist is the distance from the objective shoulder to objective focal plane; objectives with same distance can be interchanged with little or no refocusing; standard 10X, 20X, and 50X parfocal distance assumes use of included 3.53 mm adapter ring.

Spatial Sampling is the pixel size on the sample. It is derived from the camera pixel size divided by the system magnification.

(1) Not applicable to ZeGage.

Specifications subject to change without prior notice.
